## General Information

This document describes the Bridge eCQM v1.0.0 Real Word Testing Results for the year 2023. The 21<sup>st</sup> Century Cures Act Final rule mandates that health IT developers of certified health IT test the real-world use of Health IT for interoperability, as defined by the 2015 Edition Certification Criteria. The functionality and use cases included in this testing effort include all certification criteria under 45 C.F.R. §170.315 (c)(1-3) to which Bridge eCQM v1.0.0 is certified. This test results reports and evaluates the real-world usage of the certified criteria, while limiting provider and office workflow disruption.

### Developer Name

- The Garage Solutions, LLC

### Certified Product Name and Version

- Bridge eCQM v1.0.0

### Certified Health IT Product List (CHPL) ID:

- 15.04.04.1520.Brid.05.01.0.231228

### Developer Real World Testing Plan Page URL

- [https://thegaragein.com/New/pdf/Real-World-Test-Plan-2023\\_Bridgev5.3.0.pdf](https://thegaragein.com/New/pdf/Real-World-Test-Plan-2023_Bridgev5.3.0.pdf)

### Developer Real World Testing Results Page URL

### Standards Updates(SVAP and USCDI)

Yes, I have products certified with voluntary SVAP or USCDI standards. (If yes, please complete the table below.)

No, none of my products include these voluntary standards.

<b><u>Standard (and version)</u></b>	<b><u>Updated certification criteria and associated product</u></b>	<b><u>CHPL Product Number</u></b>	<b><u>Conformance Measure</u></b>

## Test Results

### Care Setting(s)

The care setting for which the product would be implemented is the ambulatory care setting.

### Metrics and Outcomes

<b><u>Certified Measure Criteria</u></b>		
<b><u>Planned Metric</u></b>	<b><u>Justification</u></b>	<b><u>Expected Outcomes</u></b>
<b>170.315(c)(1) Clinical quality measures – record and export</b>		
Demonstration of the ability to export patient data recorded in the EHR for a specified patient population and import that into the Cypress Test Tool for calculation of specified quality measures.	To demonstrate that the calculation of quality measure out of Bridge v5.3.0 produces the same results when calculated by the source system and/or configured testing tool (ex. Cypress Testing Tool).	Documentation evidencing the ability of the application to export quality measure data used in achieving matching results in the demonstration for 170.315(c)(2) when quality measures are calculated by the Cypress Test Tool.
	<b><u>Total Number of QRDA I exported for Testing</u></b>	<b><u>Percentage of QRDA Is tested and met data validation</u></b>
	287	99.7%
<b>170.315(c)(2) Clinical quality measures –Import and calculate</b>		
Demonstration of the ability to calculate quality measures for the patient population and measures specified	To demonstrate that the calculation of quality measure by the EHR produces the same results when they are calculated by the source system and/or configured testing tool (ex. Cypress Testing Tool).	Documentation evidencing the ability of the EHR to export quality measure data used in achieving matching results in the demonstration for 170.315(c)(1) when quality measures are calculated by the Cypress Test Tool.
	<b><u>Total Number of QRDA I imported for Testing</u></b>	<b><u>Percentage of QRDA Is tested and met data validation</u></b>

	305	99.3%
<b>170.315(c)(3) Clinical quality measures--report</b>		
<p><b>Change:</b> For this measures the testing of CMS successful upload was not implemented as no clients had implemented this tool for their 2023 PY reporting. For this testing use case we substituted CMS testing and conformance with internal testing and conformance using the exported QRDA IIIs to validate the compliance with expected reporting results.</p>		
Demonstration of the ability to generate QRDA 1 and QRDA 3 files which comply with the CMS QRDA Implementation Guide.	To demonstrate that the Bridge v5.3.0 can produce QRDA files acceptable for submission to CMS sponsored quality reporting programs.	Documentation evidencing successful submission of QRDA files to CMS sponsored quality reporting programs via client attestations of successful upload
	<b><u>Total Number of QRDA III pulled for Testing</u></b>	<b><u>Percentage of QRDA IIIs tested and met data validation</u></b>
	250	99.5%

## Key Milestones

<u>Timeline</u>	<u>Milestone Description (Ambulatory Care Setting)</u>
<b>November 2022</b>	2023 Plan Submission <ul style="list-style-type: none"> <li>▪ Submit Real World Test Plan for 2023</li> </ul>
<b>January 2022</b>	Customer Participant Recruitment <ul style="list-style-type: none"> <li>▪ Identify Practices willing to participate in RWT</li> <li>▪ Detail project plan and scope</li> <li>▪ Confirmations and Agreements</li> </ul>
<b>February – May 2023</b>	Testing Phase 1

	<ul style="list-style-type: none"> <li>Conduct testing with confirmed practices in accordance with the Testing Methodology/Method described for each certification criteria</li> </ul>
<b>June 2023</b>	<p>Initial Report Creation</p> <ul style="list-style-type: none"> <li>Results report based on phase one testing, and review and identify any issues that were not resolved during the testing phase directly and determine further testing requirements.</li> </ul>
<b>July – August 2023</b>	<p>Testing Phase 2</p> <ul style="list-style-type: none"> <li>Conduct additional testing with fixes applied for any issues identified in testing phase 1 to ensure all issues have been addressed</li> </ul>
<b>September 2023</b>	<p>Final Report Creation</p> <ul style="list-style-type: none"> <li>Review results of phase 2 testing and finalize report for review with appropriate technical teams.</li> </ul>
<b>October 2023</b>	2024 Real World Test Plan Submission
