

2025 Platform Certifications

Certification	Description	Benefits
ONC Certified (Bridge) 	Bridge v.5.3.0 is ONC Certified under the 2015 Edition criteria. It supports certified clinical quality measures (eCQMs) such as CMS 165v9, CMS 122v9, and CMS 2v10, and includes QRDA I and III export capabilities for CMS reporting.	- Simplifies participation in CMS programs like MIPS and ACO initiatives. - Enables seamless eCQM extraction and reporting for value-based performance. - Reduces compliance burden through pre-validated infrastructure.
ONC Certified (Ignite) 	Ignite, The Garage's virtual health application within Bridge, is ONC Certified. It supports secure patient access, interoperability, and CMS Promoting Interoperability compliance.	- Ensures you meet federal interoperability requirements out of the box. - Enhances digital front door strategies with secure FHIR-based access for patients. - Supports compliance with CMS incentive programs.
SOC 2 Type II 	The Garage maintains SOC 2 Type II compliance, validated by independent audits against rigorous standards for security, confidentiality, and availability.	- Speeds up procurement and IT security reviews with industry-standard third-party assurance. - Reduces vendor risk and instills confidence with partners and enterprise payers. - Provides documented practices for audit readiness.
HITRUST i1 	The Garage has achieved HITRUST i1 Certification, validating 182 foundational security and privacy controls aligned with HIPAA, NIST, and other leading frameworks. Certification is reviewed and renewed annually.	- Speeds up procurement and IT security reviews with industry-standard third-party assurance. - Reduces vendor risk and instills confidence with partners and enterprise payers. - Provides documented practices for audit readiness.
eCQM Certified 	The Garage is certified for electronic Clinical Quality Measure (eCQM) reporting. This certification demonstrates our verified ability to electronically calculate, extract, and submit standardized quality metrics directly from your EHR and clinical data, as required by CMS and other major quality programs. Certification requires rigorous annual real-world testing to ensure consistent, accurate results aligned with evolving national specifications.	- Enables accurate and trusted quality reporting across programs like ACO, MIPS, and PCMH. - Positions your practice for better performance-based reimbursement. - Reduces the risk of data errors and audit findings.
NCQA Certified (HEDIS) 	The Garage has received NCQA Measure Certification for HEDIS® quality measures. This independent certification verifies that our platform consistently applies the official HEDIS logic and reporting specifications, including the latest digital and Electronic Clinical Data Systems (ECDS) methodologies. The NCQA process includes a thorough review and audit of our calculation methods, affirming our ability to support health plans, providers, and payers with trusted, compliant HEDIS reporting.	- Enables accurate and trusted quality reporting across programs like ACO, MIPS, and PCMH. - Positions your practice for better performance-based reimbursement. - Reduces the risk of data errors and audit findings.

Security Infrastructure & Governance

Trust Framework: Hosting in SOC-certified data centers, DR sites in FL/VA/TX, 350+ servers, 2PB+ data under management

Cybersecurity Operations: Real-time threat monitoring (CIPP), quarterly pen testing, Sophos InterceptX for endpoint protection.

Governance: Annual HIPAA Security Risk Assessments, documented policies (patching, incident response, acceptable use), and a designated HIPAA Security Officer.
