## What do we have to offer?

The Industry's most comprehensive and most effective population health management platform, BRIDGE, for value based care.

### Advanced Analytics

Actionable and predictable insights generated by aggregating and normalizing data across multiple sources - EHRs, Payers, HIEs, Public Registries etc.

### Care Coordination

Tools to allow for synchronization and orchestration of right care at the right time for all healthcare needs across specialties.

### Care Management

The Industry's most comprehensive Care Management suite that allows for both centralized and de-centralized management for High Risk, High Cost High Need, SDOH, Behavioral Health and other specialized needs.

### Patient Engagement

A mobile first, telemedicine-enabled, 360 degree approach to engage patients while At-home, On-the-go or at the Point of Care.

### Risk & Performance Management

A comprehensive toolset that allows for Risk adjustment, Revenue optimization, Provider performance tracking and Patient Adherence management.

### Comprehensive Data Integration

Established interfaces across 100+ EHR systems, all national and most regional payers, most national and regional HIEs etc.
